CCSSE 2019 Executive Summary of Results

The *CCSSE* benchmark scores are groups of conceptually related survey items that address key areas of student engagement. The five benchmark scores noted above are educational research areas shown to be important to students' college experiences and educational outcomes. Therefore, they provide colleges with a useful starting point for looking at institutional results and allow colleges to assess and monitor their performance in areas that are central to their work. In addition, participating colleges have the opportunity to make a more appropriate and useful comparison between their performance and that of groups of other colleges.

Performing as well as the national average or a peer-group average may be a reasonable initial aspiration, but it is important to recognize that these averages are sometimes unacceptably low. Aspiring to match or exceed high-performance targets is the stronger strategy.

Therefore, the above is a comparison of your college's standardized benchmark scores with the average benchmark scores from the top 10% of the current three-year cohort.

For further information about *CCSSE* benchmarks and how they are computed, please visit www.ccsse.org.
